- ✓ Digital Accuracy .0001"
- ✓ One Year Warranty
- ✓ Switchable inch/metric
- ✓ SPC Output
- ✓ Convenient Battery Replacement

**SUPPLIED WITH 50 PREMIUM
GRADE ALMEN STRIPS**

Almen Gage

Precision crafted in the USA and available with all the features needed to satisfy the most stringent specifications. Every detail has been optimized for the utmost in performance and convenience. Starting with the certified accurate construction, the gage is designed to give many years of trouble-free, reliable service.

You'll like the sure grip feel of the magnetic holder. And, since all of the holding force is concentrated at the support balls, absolutely no strip distortion can occur. This assures you of highly accurate readings of even the thinnest of test strips.

A special low force indicator spring is used to prevent distortion to 'N' strip readings which can occur with other gages. The base components are accurately placed and certified to meet all Almen gage specifications.

A curved check block that represents an ideal Almen Strip with approximately 0.024" curvature is included with the TSP-3. This block should be used weekly by the customer as a "function check" of the gage.

Meets requirements for:

MIL-S-13165C	GE P11TF3
SAE J442	GE P11TF8
SAE AMS 2432	BAC 5730
