

## TR207L Cleaning Compound

**TR207L** is a highly active liquid detergent designed for use in submersion baths for cleaning heavy contaminants from hard metals.

**TR207L** imparts corrosion protection during application.

**TR207L** is recommended for applications that contain excessive amounts of crude or protein oil deposits, lubricant residue, buffing compounds or marking paints.

**TR207L** reduces surface and interfacial tensions on the surface to allow for quick emulsification of crude and protein based contaminants. High sequestering and water softening qualities allow for quick lock-up of iron, calcium, magnesium, and other industrial and water based ions.

**TR207L** is used at the rate of 2 ounces per gallon of water added to the system. Heavier contamination will require higher dilution rates.

### PHYSICAL DATA

PHYSICAL FORM	Liquid	WATER SOFTENING	Excellent
ODOR	None	EMULSIFICATION	Excellent
SOLUBILITY	Complete	CORROSION INHIBITION	Good
COLOR	Brown	RINSING	Excellent
SPECIFIC GRAVITY	1.10	FOAM	Low
PH WORKING SOLUTION	11.5	FLASH POINT	None

**WARNING: Eye & Skin Irritant**

- Goggles and gloves should be worn when handling this product.
- Contact with eyes can cause tissue damage and irritation. Should contact occur, flush eyes with water for 10 minutes. Use boric acid eye wash solution if available. If irritation persists, get medical attention.
- Contact with skin should be washed with soapy water. Remove contaminated clothing and wash before reuse.
- This material contains sodium hydroxide (CAS reg. No. 1310-73-2) which is identified as a hazardous chemical under the criteria of OSHA Hazard Communication Standard (29CFR.1910.1200).

**WASTE DISPOSAL:**

- This product is biodegradable.
- Consult local authorities prior to disposal.
