

TR210L Cleaning Compound

TR210L is a moderate pH balanced vibratory compound used primarily on aluminum and other soft metals. It cleans and rids the part of common surface oils while at the same time imparting a luster to the skin surface.

TR210L is used with steel media where applications call for extended vibratory use, Parts are usually cob dried after use with this product.

TR210L allows for quick emulsification of crude and protein based contaminants. Water softening qualities allow for quick lock-up of iron, calcium, magnesium, and other industrial and water based ions.

TR210L imparts rust protection for a limited amount of time. Extended protection requires the use of TR630L.

TR210L is used at the rate of 2 ounces per gallon of water added to the system. Heavier contamination will require higher dilution rates.

PHYSICAL DATA

PHYSICAL FORM	Liquid	WATER SOFTENING	Good
ODOR	None	EMULSIFICATION	Excellent
SOLUBILITY	Complete	CORROSION INHIBITION	Good
COLOR	Yellow	DEBURRING	Good
SPECIFIC GRAVITY	1.06	BURNISHING	Good
PH WORKING SOLUTION	8.8	LUBRICITY	Good
FLASH POINT	None	MEDIA COMPATIBILITY	All
FOAM	High		

WARNING: Eye & Skin Irritant

- Goggles and gloves should be worn when handling this product.
- Contact with eyes can cause tissue damage and irritation. Should contact occur, flush eyes with water for 10 minutes. Use boric acid eye wash solution if available. If irritation persists, get medical attention.
- Contact with skin should be washed with soapy water. Remove contaminated clothing and wash before reuse.

WASTE DISPOSAL:

- This product is biodegradable.
- Consult local authorities prior to disposal.
